

The Federal Communications Commission

Dear The Federal Communications Commission,

Please reject any proposals (e.g., the "flat fee" proposal) that change how contributions are made to the Universal Service Fund.

For example, under the flat fee proposal, individuals making a few long distance calls pay the same those that make many calls. In this manner, low-volume (residential) users bear the same universal service fund burden as a high-volume users. This is unfair!

I urge you to consider only proposal that fairly allocate the burden of the fund.

Thank you for your kind consideration.

Sincerely,

Mark Muller
